

Language & number system

No borders all-around.

I think that human needs to create something new always. Whenever numbers and language, we may change it. It gives us possibilities to think more.

I think many people in childhood create their language with friends. It is will be simple game but why we do it. It is nice way to self-realization. I know that in some countries you may create your own church and create culture. It is great and it do us better.

My idea is not to have money or make something better than it could be. It is studying and creating, I try to live like small child because they have every time positive thinking and in the main – a lot of curiosity.

I create about five numeral systems for different doings and use it all the time. This is not a perfect one, they all connected to sense, that coming from Maia, Egypt, Aztecs, Greek, Rome, China and a lot of more that I study and research.

I contain this knowledge and make from them something new. I try not to copy something, I try to find and collect meaning.

The last numeral system is circles. It is 12 types of circles. Circle without something – zero. After they similar to o'clock. If number 1 there are dot in place where 1 at o'clock.

It is not all; I make from it different in plus, minus, divide and multiply. There are no sign, its place regard another symbol. If you want to make minus number – dot in the circle; you want make plus, dot abroad circle; multiply is circle in circle; divide is circle separated another circle.

I in a point of view Jaques Fresco about languages. It is great to talk like melody and sing to said something. I think that it is too difficult to talk every time.

At all, I think that I cannot do it and propagate it. If someone want to learn it, I said and I really be happy if someone see from my point of view. Nevertheless, I do not understand this kind of marketing, where you come everywhere and try to recruit someone. If someone want to know I said, if do not want I talk about something more interesting to person.

I think the main is to make something strange and use it because it's doing us smarter. Whenever we change it and this is may be better than we have. I think a lot of people is changing their language with friends. It's will be simple game but why we do it. It's will be way to self-realization. I know that in some countries you may create your own culture. It's great and it's doing us better.

I want to be like or thought, it's I think target to be human. My idea isn't to have money or something better than it could be. It's simple studying and creating, I try to live like small child because they have every time positive thinking and in the main – a lot of curiosity.

I make about 5 numeral systems for different doings and use it all the time. This is not a perfect one but it's connected to sense, that coming from Maia, Egypt, Aztecs, Greek, Rome, China and a lot of more that I study and research.

I contain this knowledge and make from them something new. I try not to copy something, I try to find and collect meaning. After it I processing and make result that I prefer at this moment. The last numeral system is circles. It's 13 types of circles. Circle without something – zero. After they similar to clocks. If number 1 there are dot in place where 1 at clock. It's not all, I make from it different in plus, minus, divide and multiply. There are no sign, it's place regard another symbol. If you want to make minus number – dot in the circle, if you want make plus. Dot abroad circle. And this is not all rules, multiply is circle in circle and divide is circle separated another circle.

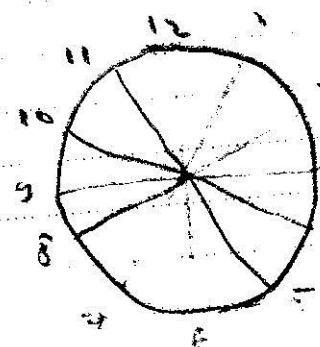

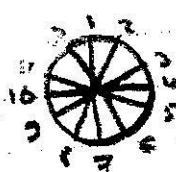

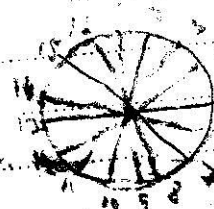

I want to make language that I can use for most powerful word, that I use. I in a point of view Jaques Fresco about languages. It's great to talk like melody and sing to said something. I think that it's to difficult and almost not in this thousand years. I want to make something more constantly and simple, the first word that I want to make it's word about chance and god, because there are to big difference in this words, but it's equal for these stage of living. We don't live in moment, there gods make us greater like nation. We haven't sacrifices to god bless and don't have meeting with government where we all stay and just pray. It's someones opinion, like my. But humans long years don't do something like "Praying day". Everyone do what he want to do. There are no mystic or racism, I only try to said my opinion about god culture. I think that it's chance, that in future we could categorized. Come to start, I want to make language at all for word order, because chaos is really good word, but order isn't it.

I think all humans is chaos and order, It's every doing like black and white or light and dark. But chaos it's for me not systematic and order – is systematic. There are the chaos that done by chance and the order that done with some kind of sense.

At all I think that I can't do it and propagate it. If someone want to learn it I said and I really be happy if someone see from my point of view. But I don't understand this kind of marketing, where you come everywhere and try to recruit someone. If someone want to know I said, if won't I talk about something more interesting to person.

It's not a simple saying, I may compare it to social networks. Where people for money make too much bad contain of everything, - it's will be glut information.
