

Author / Writer

For me it is way to realize and make something great.

I have a lot of story that I write from accident. I write dreams after sleep. I describe accidents after they were occurred. Completely remember story that we are talking with my friends at least.

All of these creates a small baggage of knowledge about storytelling. Of course, I need a lot of practice to write in English and make it not bad. My style do not formed now and I need to find him. I try to analyze what I write and more than all I try to understand how I writing.

Year ago I start write 3 novels from psychosomatic hospital. After end of being there. I do not start storytelling more and there are may be 5 – 10 pages in Russian. Almost I save during my life about 300-360 lyrics. That connected to my feeling and thoughts.

If I will said to true. I did not like some of great writers with the exception of Pushkin.

I have not more about resume because I work only like copywriter on different sites. It is sometimes have been English, sometimes Russian sites. There are about 100-150 different articles. This is has been my interest in 15-16 y.o. After It, I start write for my own and my thoughts.

I cannot said that I may write book for order. Only because it needs a lot of my time. Of course, if this idea shocked me, and client wants to give it to me.

I want to write books about fantastic and scientific. I have a good idea for these books, but I need time to upgrade value of ideas.

In addition, I want to learn better these skills. Cause of all I consider it important.

Almost I have a beautiful game of feelings and I want to write about 2016-2018 years.

I have a lot of stories and I feel that I do something crazy from it.
