

Analyst

For me analyst the same as economist. I will describe my opinion. I think that economist will analyze all what complicated with money.

Therefore, the analyst may do some more, like analyze workers and almost design. Of course analyst have a lot of different points to categorize, but good economist for good analyze needs to do the same things as the simple analyst.

I try to make analyst every day anytime of everything that I am interested. My target is not to make numbers. It is research from past and prediction to future. I like to make sense for action and control it by human mind (description).

I cannot said something about my official practice in it because I do not to work in this proficiency. I work only for myself. It starts from my first business in 3rd grade and continue for this moment. I try to know about it more.

Sometimes I cannot create analyze in moment and I take it for training in my mind. I try to count values from environment and make statistic. For example: in 6-8 years old when we are travel somewhere I count manholes during walk. I may count more than 500 manholes during one walking. Once I count ~2500 manholes during one walk and proud for myself.

Correspondence / Journalist

All my life I train how to ask questions correctly and fully. I think that asking way to be better and more stupid. I will explain what I means.

{ If you know something, you do not know more than you start know. }

The more you know, the more you do not know.

I like to ask interesting person something strange and interesting. My questions usually gives opportunity to think after talk less than in process. It is may be good or may be bad, but it is chance.

I cannot work in it any time and usually. If I have interest in something, I will do it and no more.

May be it is my bad to be any way stupid. Nevertheless, I want to be the most ignorant person in the world. I think it needs every journalist or correspondence.

Teacher / Mentor

All my childhood I absorb different knowledge and make it very fast. My knowledge come stronger and from 12 years I start teach my brother to play football, after I teach how to play computer games. Soon I make it not only for my family. I teach different people to do something in programming, hacking or cyber security.

After it I start, teach everywhere and every time if it needs. Of course I have understanding of culture and I know that people may know more than me. I said it not like a teaching might be like theme to discuss. If I see that person cannot do something I do not say that person do something wrong. I said could I help you, often it is. I help by hints and I do not want to do all work for person.

My teach is not something special, but I know psychology and may help more than others in social way. I know something good and something bad. But if good friend said me, you know nothing in it I said always. Yes, I know nothing, but you think about it from another side and

show my vision of solving problem. Usually they think a lot about my thought but cannot said me that I said true.

I like teaching, but more than it I like to study something new.

Aeterna discipulus.

Operator / Cameraman / Photographer

I like to save beautiful moments that may create emotions in future.

There is my memory that save in moment. I Have some experience in it and know some technique of making photo, because my mother professional photographer that do some works for Vogue.

I make this from 5 years and really like to make photos, either be in photo. I create scenes by photos and try to make sense.

From 10 years, I really start watching to small details on photo, moving and recording.

I like to see sense where it cannot be for others. My task in this experience is make beautiful complementation of colors and sense. I like use strange methods like differentiae the photo by glass or mirror.

I may said that I work with my mother. However, it has cannot be real work. I try to find new ways to make photo and talk to mom my ideas, she do not hear me. Nevertheless, I do it for me and really like to make beautiful strange photos.

Now I have not a lot of photos that can be in my portfolio. I lost a lot of them during my life. I share my saved photos and compositions, but it is a few of all.

I want to work as moment catcher; I think it is interesting for start.

Scientist

I think that scientist is a work that have not big salary in most of all. I think that scientist is the benefit to humanity. They need have more salary.

Scientist is human that try to research some kind or discipline in science to make it more. I wonder to make science great and better, and for me very hard to think about who am I. Scientist or businessperson, I want to help world much more and there are the question, how I can do it.

I cannot said that I wish to be scientist. However, I may say that I will me scientific businessperson.

Analyst

For me analyst the same as economist. I will describe my opinion. I think analyze all what complicated with money.

Therefore, the analyst may do some more, like analyze workers and almost all analyst have a lot of different points to categorize, but good economist for good do the same things as the simple analyst.
