

Glass

Mechanic drink glass

These we have at these moment at least but I want to make it for me.

I want to make glass that may collect information about liquid automatically and it will be drink without turn it.

Glass needs to have tunnel near sides that connected to the foundation side. Under automatically defined water level coming pressure that turn water to the top.

May be from 300 – 25 000 \$. Time 6 – 41 weeks.

In result 275 – 36825 \$. Time 5 – 60 weeks.

There are main difference in type of glass. Cause of it – we may see smart glass or simple mechanism. Also I need to make it eco-product of course.

Glass

mechanic drink glass

These we have at these moment at least but I want to make it for me.

I want to make glass that may collect information about liquid automatically and it can be drank without ground of glass.

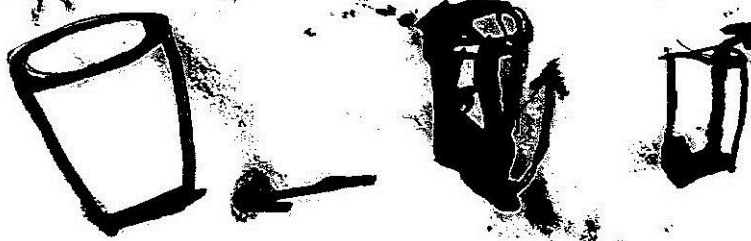

Glass needs to have tunnel near sides that connected to the foundation side. Under automatically defined water level coming pressure that turn water to the top.

May be from 5 000 – 25 000 \$. Time 20 – 41 weeks.

In result 6950 – 36825 \$. Time 27.8 – 60.4 weeks.

Amme's Bowl
2/8

Amme's Bowl

People like useful and comfortable

- possibility for drinking may be in all ways of all rotating types
- this needs to be cheap optimum cost

• Handmade

Project of SMART GLASS

Main Task of this project
to do simpler usual things

glass B
water
liquid

How we drink

by rotating glass.

<this is useless action>

biology & containing water

we need to remove
