

Screenwriter / producer

My interest near film, cartoon, game making. I think that it makes us better giving your vision for other people. I may collaborate it with my passion in writing. Because I have a great ideas for film and I think that no one can do it as I see it. Of course, anybody say me – “to create something good, you need to give it another people that have different view”. In Russia, we call it “broken phone”, when someone say to another, another say it to next person and in the result, we have cow from zebra.

I want to write book, film and make in real all of it by systematic education.

You may critic that I want too much. I do not think so. My ideas really complicated. It is my way of being.

I really want to be part of screenwriting or producing after my work. Cause of all I need some experience and I study fast.

I may start from simple assistant and train on real film production.

I will describe my scenery after in small book, I think that it ^{will be} ~~will be~~ crazy, but I really do not know when I ~~may do it~~. Cause of all I have really few time for all my ideas.
