

## Tablet

Begin to the start of notes.

Tablet is kind of small recorder or something similar with small computer. I think that tablet needs to be small and useful. There are kind of smart book or record book. We need to use tablet by fingers. I want to add possibilities to write by hand on first plan. That could help for every art person.

Here may be similarity with instrument and material to do something like papyrus. Now I try to create working technique of connection between two batteries that needs to be in symbiosis, that make work of all tablet together.

This tablet needs to be really simple for client and complex for realization.

I think this is start from simple text redactor for my own. I will create it by myself and try to upgrade. I think I start from simple text and graphic redactor. I really want to make it from start.

I think that this project may be in compilation with phone project, but I do not see similarity in these products anyway.

I try to list main parts of idea:

- You must not see difference between paper and tablet!
- You cannot use tablet as waste time product, it was material and instrument in first place.
- You may take it everywhere and every time.

Why it better and help us?

- We save trees!
- We upgrade human
- We do something useful and change psychology

Predictions:

Cost: 45 000 – 7 050 000 \$

Time: 50 – 140 weeks

## Tablet

Back to the start of digital notes.

I think that tablet is kind of small recorder or sometimes it's similar with small computer. I think that tablet needs to be small and useful. There are kind of smart book or record book. We need to use tablet from hands and fingers. I want to add possibilities to write from hand on first plan. That can help for every art person.

Here may be similarity with instrument and material to do something. Now I try to create working technique of connection between two batteries that needs to be in symbiosis, that make work of all tablet together.

This tablet needs to be really simple for client and complex for realization.

I think this is may be starts from simple text redactor for my own. I will create it by myself and try to upgrade. I think I start from simple text and graphic redactor. I really want to make it from start.

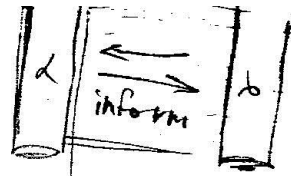

I think that this project may be in compilation with phone.

This starts from 45 000 – 350 000 \$ and in time 50 – 140 weeks.

58 500 – 490 000 \$

65 – 196 weeks.

Here the most expensive and longest is compilation of batteries, work of folding screen and the main target concept of these device (what applications and targets it needs to have.)

- 1  $\Delta$  have data  
 $\rightarrow$  have data  $\rightarrow$  change ~~li'ness~~ ~~data~~ and they live alone

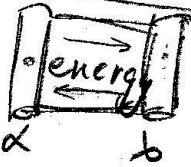

- 2  $\Delta$  have data  
 $\rightarrow$  have no data

- 1  $\Delta$  input information  
 $\rightarrow$  input information

- 2  $\Delta$  processing information  
 $\rightarrow$  processing information

- 1  $\Delta$  have processor  
 $\rightarrow$  have no processor

- 2  $\Delta$  have processor  
 $\rightarrow$  have processor

1. wireless
2. in screen wires

- 1  $\Delta$  have battery  $\frac{10}{10}$

- $\rightarrow$  have no battery  $\frac{0}{10}$

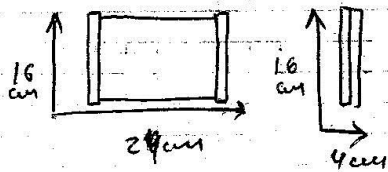

- 2  $\Delta$  have battery  $\frac{8}{10}$

- $\rightarrow$  have battery  $\frac{2}{10}$

$\frac{5}{10}$	$\frac{7}{10}$	$\frac{9}{10}$
$\frac{3}{10}$	$\frac{1}{10}$	

$\frac{10}{10}$  All possibilities

Predictions of human bad:  
Cost: 58 500 – 1 240 000 \$

Time: 65 – 196 weeks.

Here the most expensive and longest is compilation of batteries, work of bold\* screen.

I may show this project because I see this product in Apple Corporation patent office. I do it before by my mind and see patent only after creating this idea. Apple you doing good ideas in this way ☺  
P.S. But I do more,,,
